Hamburg, March 27th 2022

Dr. Mohammed al-Khudari und Dr. Hani al-Khudari

Your Majesty,

The health situation of Dr. Mohammed al-Khudari (84) is rapidly deteriorating in detention in Abha prison, in Saudi Arabia's 'Asir Region, where prison authorities continue to deprive him of the urgent specialized medical care he requires for his advanced prostate cancer. Dr. Mohammed al-Khudari is now completely deprived of any cancer medication and has not seen a specialist for the past two years, since his transfer from Dahban prison to Abha prison, which lacks medical care for detainees. In addition, he urgently needs to see a cardiologist, a bone doctor and a dentist to treat his numerous ailments. Depriving him of adequate medical care is a violation of his right to health and puts his life at risk. His son, Dr. Hani al-Khudari also requires urgent medical care to remove kidney stones in addition to urgent dental care.

We call on your Majesty to ensure that Dr. Mohammed al-Khudari is immediately transferred to the hospital to receive the urgent specialized medical care he needs, and that Dr. Hani al-Khudari is granted the adequate care he requires. Furthermore, we reiterate our call that the trumped-up charges against him and Dr. Hani al-Khudari are dropped, their conviction quashed and that both men are released.

Yours sincerely,
